

Nitin Shivhare

Full Stack Developer • MERN Stack • Backend Engineering

+91 8989181557 | nitin.alt99@gmail.com | linkedin.com/in/nitinshivhare | github.com/Nitin-Shivhare

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and shipping production-ready MERN stack and Python Backend applications. Proficient in architecting RESTful APIs, implementing JWT and OAuth 2.0 authentication flows, and designing responsive UIs with React and TailwindCSS. Proven ability to take projects from zero to deployed product independently. Actively seeking junior full-stack or backend roles where clean code, scalability, and real user impact matter.

PROJECTS

OpenSourceWiki | open-front-two.vercel.app

Jun 2024 – Present

A full-stack knowledge-sharing and blogging platform built with the MERN stack, inspired by Notion and Wikipedia.

- Engineered end-to-end MERN architecture (React, Node.js, Express, MongoDB) and deployed to Vercel; handles concurrent users with modular RESTful API design across auth, posts, users, and notifications.
- Built a custom rich-text editor from scratch supporting formatting, image embeds, code blocks, and nested lists — eliminating the need for a third-party editor library.
- Implemented JWT-based session authentication and Google OAuth 2.0 sign-in, reducing unauthorised access surface with HTTP-only cookies and token refresh logic.
- Developed a real-time notification system for likes, comments, and follows using polling, improving user engagement and platform interactivity.
- Designed Mongoose schemas with indexing on frequently queried fields, cutting average API response time and ensuring consistent data integrity across collections.
- Delivered a fully responsive UI using TailwindCSS and Framer Motion; achieved smooth cross-device experience across mobile, tablet, and desktop breakpoints.
- Built user dashboards with draft autosave, post publishing controls, profile editing, and social link integration** — creating a self-contained content creator workflow.

Dec 2025

An interactive Windows 98-themed developer portfolio built with React, showcasing UI creativity and strong frontend engineering fundamentals.

- Recreated a functional desktop OS UI in React including draggable windows, a live taskbar clock, double-click file icons, and context menus — using component state and event delegation patterns.
- Managed complex interactive state (window focus, z-index layering, drag offsets) using React hooks (useState, useRef, useEffect) without any third-party UI library.
- Optimised rendering performance by minimising unnecessary re-renders with careful state scoping, resulting in smooth interactions across devices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3, TailwindCSS, Framer Motion, Redux Toolkit

Backend: Node.js, Express.js, FastAPI, REST API design, JWT

Databases: MongoDB, Mongoose, PostgreSQL, SQLAlchemy

Tools & DevOps: Git, GitHub, Postman, Firebase, Vercel, Linux (daily driver), VS Code

Concepts: MVC Architecture, RESTful API Design, Authentication & Authorisation, Responsive Design, Performance Optimisation

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2025

Rabindranath Tagore University, Bhopal, MP | CGPA: 7.28 / 10

Class XII — CBSE, 84% | Class X — CBSE, 81%

2022 / 2020

PM SHRI Kendriya Vidyalaya NKJ, Katni, MP
