PROFESSIONAL SUMMARY

Full Stack Developer with production experience across the MERN stack, TypeScript, and PostgreSQL/Supabase. Recently completed a Full Stack Developer internship at Reoxide, an AI-powered carbon credit marketplace, where I built an end-to-end Stripe subscription billing system, a Python ETL pipeline orchestrating 27 carbon-registry data sources, and owned pull request review and production deployments for the engineering team. Ships features independently from database schema to deployed UI, and has shipped two self-built full-stack applications from scratch. Actively seeking full-time Full Stack Developer roles.

EXPERIENCE

Full Stack Developer Intern | Reoxide Technologies Pvt. Ltd. (Acquired) | reoxide.com *May 2026 - September 2026*

AI-powered carbon credit marketplace connecting project developers with corporate buyers, built on React/Vite/TypeScript, Bun/TypeScript/Drizzle ORM, Supabase, and Python/FastAPI ML microservices, deployed via Docker on AWS ECS.

- **Built the platform's full Stripe subscription billing system** end-to-end covering a 30-day free trial lifecycle with automated trial-to-expired state transitions, recurring $9/month paid billing for the Explorer tier, and end-of-cycle access retention on cancellation- enabling monetization across all 4 user roles (Buyer, Seller, Consultant, Trader).
- Built a Python ETL pipeline that orchestrates 27 carbon-registry scrapers, normalizing all output to a standardized schema and producing Supabase-ready datasets via a config-driven, retry-aware runner.
- **Took sole ownership of pull request review and production deployments** for the engineering team after the previous owner's departure, becoming the team's primary release gatekeeper.
- **Serve as the team's primary bug fixer**, identifying, triaging, and resolving the majority of production issues surfaced across the platform.
- Audited backend dependencies with Knip to identify unused code paths in the Bun/TypeScript service, trimming bundle bloat and improving build hygiene.

PROJECTS

OpenSourceWiki | open-front-two.vercel.app *Jun 2024 – Present*

A full-stack knowledge-sharing and blogging platform built with the MERN stack, inspired by Notion and Wikipedia.

- **Architected a full-stack blogging/knowledge platform** (React, Node.js, Express, MongoDB) with a modular REST API spanning auth, posts, users, and notifications, deployed to Vercel.
- **Built a custom rich-text editor from scratch** supporting image embeds, code blocks, and nested lists — removing a third-party editor dependency and its licensing/bundle-size overhead.
- **Implemented JWT and Google OAuth 2.0 authentication** with HTTP-only cookies and token refresh, closing unauthorized-access gaps in session handling.
- Indexed Mongoose schemas on high-traffic query fields to cut average API response time, and shipped a real-time-feel notification system (likes, comments, follows) via polling.

Windows 98 Themed Portfolio | nitinshivhare.com *Dec 2025*

An interactive Windows 98-themed developer portfolio built with React, showcasing UI creativity and strong frontend engineering fundamentals.

- **Recreated a functional desktop OS UI in React** — draggable windows, live taskbar clock, double-click file icons, and context menus- using pure component state and event delegation, with zero third-party UI libraries.
- Managed window focus, z-index layering, and drag-offset state via useState/useRef/useEffect, and scoped re-renders carefully to keep interactions smooth across devices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Frontend: React.js, Next.js, Vite , HTML5/CSS3, TailwindCSS, Framer Motion, Redux Toolkit
Backend: Node.js, Express.js, FastAPI , Bun ,REST API design, JWT & OAuth 2.0, Drizzle ORM
Databases: PostgreSQL, Supabase , MongoDB, Mongoose , SQLAlchemy
Payments & Integrations : MVC Stripe (subscriptions & billing), Google OAuth 2.0, Google Gemini API, SendGrid
Tools & DevOps : Git/GitHub, Docker, AWS (ECS, ECR, S3), Vercel, Postman, Linux, VS Code

EDUCATION

Bachelor of Computer Applications (BCA) *2023 – 2025*
Rabindranath Tagore University, Bhopal, MP | CGPA: 7.28 / 10
